## ORDERING INFORMATION

**SIZING INFORMATION:** This size chart will help you in your choices, please remember when your horse has a full winter coat you will need one size larger than you might normally buy. Often, your mini's height plus 10" will be their blanket size (example, my mare measures 28" and she wears a 38" blanket, in the winter she wears a 40" in the Polar Tec line). You can also measure from the middle of the chest, down the widest part to the point of the rump, this number will be your blanket size (i.e. 44" long horse will be a size 44), and is the best method for measuring for the Triple L line of blankets. Blanket sizes come in 2" increments, round up – not down for sizing (i.e. if your horse measures 41", buy a 42" blanket). Special orders or embroidered orders are not returnable – please be sure of your size. Allow room for lifting the tail when ordering blankets with the full tail cover.
